Control Signal Preprocessing

- 1. <SOS> 好香的吻 <EOS> 12情 => <SOS> 好香的吻 <EOS> 12情 12情
- 2. <SOS> 啊 <EOS> 3 見 7 的 => <SOS> 啊 <EOS> 3 見 7 的

Encoder input data:

Normal: <SOS> 这样你的泪滴<EOS> 1能5愛

Inside: <SOS> 这样你的泪滴 1能5愛 <EOS>

Control: 1能5愛

Model Structure

- 1. Naive
- 2. Naive with encoder output
- 3. **Naive** with encoder output with control signal

Summary

- Naive is not bad
- 2. In this case, "last sentence" is less important
- 3. Remind the model of the control signal frequently
- 4. Slightly overfitting causes reduplication
